## Advanced countertop EFT terminal

### TECHNICAL CHARACTERISTICS

#### Ergonomic "All-in-One" Terminal

- One solution for credit authorization and draft capture, ATM/debit and check authorization
- Integrated design eliminates counter clutter and "spaghetti cable" look
- Multi-application architecture supports delivery of payment and value-added services

#### Promotes Superior Customer Service

- Easy-to-read, four-line backlit graphic display ensures error-free fast customer checkout
- Simple-to-use yet fully featured keyboard provides cognitive touch response that speeds transaction and increases operator confidence
- Thermal printer that is quick and simple to load paper
- Pre-print and pre-dial capabilities

#### Secure Transactions

Ingenico's UNICAPT® technology ensures software applications are developed in a secure and modular fashion. Programmers can change application modules without affecting other parts of the application and new application modules can be added to existing applications without re-certification of the whole program. Software application modules can also be used in other Elite products.

#### Inherent Investment Protection

- Secure multi-application support through UNICAPT
- Integrated smart card reader
- EMV level I and II approved
- 1 Mb memory is standard (optional 4 Mb)
- Up to two Secure Access Modules
- Two RS232 ports
- Using UNICAPT, application can be ported to any of the Elite terminal family
